<https://youtu.be/v5C77j0aJKw>

- ~Non-corrosive
- ~Non-flammable
- ~Naturally derived
- ~DOT approved for asphalt release and removal in many states
- ~Provides short-term lubrication and corrosion protection to metal surfaces
- ~Environmentally responsible
- ~Performance guaranteed
- ~Cost Effective
- ~Unique range developed by Sun Chem Industries, INC.
- ~Replaces toxic and hazardous products
- ~Reduces clients environmental impact
- ~Reduces client's safety exposure
- ~SO accredited systems and processes

HOW IT WORKS

BLACK-OFF has a similar molecular structure to bitumen, resulting in the rapid penetration of the bitumen down to the adhered surface. Spreading itself between the bitumen and the surface it effectively lifts the bitumen from the surface.

Holding the particles in solution allows them to be removed to waste or can be separated, allowing the Bitumen to be recycled

Being chemically similar allows the bitumen to dissolve in the

TAR & ASPHALT.

Once rinsed off it leaves behind a film that makes for easier subsequent cleaning.

As a superior replacement for Kerosene/gasoline/diesel/citrus products. **BLACK-OFF** saves up to 75% of the cleaning time vs. current cleaning practices!

SUMMARY:

BLACK-OFF is derived primarily from natural edible plant oils therefore are free of VOC and the customary traditional solvents making this technology now available to address the environmental issues surrounding the removal of bitumen, asphalt and heavy-duty grease.
