

Product Applications

Formulated specifically to remove Bitumen and Asphalt.

To be used on all Equipment associated with the application of bitumen and asphalt. Been successful cleaning out radiators.

Also removes bitumen from concrete, paving's, curbs and brick workshop floors and bench tops. Can be used for coating as well as cleaning equipment.

Easy to use

Best results have been achieved once dust and mud have been removed and the surface allowed to dry.

- 1) Apply **BLACK-OFF** with a hand-held pressure sprayer and allow to penetrate for 15 to 20 minutes. Etch any heavy build up.
- 2) **Rinse off** with a high-pressure spray preferably using hot water.
- 3) Heavily encrusted areas may need a second application to allow **BLACK-OFF** to penetrate fully.

technical specifications

Derived primarily from natural edible plants, and are free of VOC and the customary traditional solvents
SDS available on request

Naturally Safe

The main difference being that **Black-Off** ingredients are derived from **edible plants** and are regarded by most of its users as the "Best in its Class"!
